

## For Immediate Release

**Kansas City, MO - February 3rd, 2018** - Nuance Investment's Mid Cap Value Fund (NMAVX) has been chosen to be included on the Q1 2018 Schwab Mutual Fund OneSource Select List®.

Mutual funds on the Select List are rigorously screened by the experts in Charles Schwab Investment Advisory, Inc., based on such factors as risk, performance, and expenses.

"We are excited to be included on the Schwab Mutual Fund OneSource Select List," said Scott Moore, President & CIO. Mr. Moore went on to say, "having a research group, like the Schwab team, analyze our fund versus others, and ultimately select us, is a tremendous accomplishment for our team."

The Nuance Mid Cap Value Fund's (NMAVX) objective is long term capital appreciation and it aims to outperform its primary and secondary benchmarks on an absolute and risk-adjusted basis over the long-term. The Investment Team believes that the ability to outperform the broad stock market is predicated on a consistent and disciplined value investing approach. The Nuance Investment Team's sole focus is generating investment returns for clients by diligently reviewing one company at a time on its own investment merits. Through long-term study of each company and thorough analysis of financial statements, management strategy and competitive position, our Investment Team becomes familiar with each company bought and sold in the portfolios over time. This familiarity allows for consistent and prompt execution with the sole focus being the generation of excess returns over the long-term. Further, we are intensely focused on ensuring that we manage the appropriate amount of assets to allow future performance that has the opportunity to mirror that of the historical performance.

**Mutual fund investing involves risk. Principal loss is possible. Investments in small and mid-capitalization companies involve additional risk such as limited liquidity and greater volatility than larger capitalization companies. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. Short sale of securities involves unlimited risk including the possibility that losses may exceed the original amount invested. However, a mutual fund investor's risk is limited to one's amount of investment in a mutual fund.**

The primary benchmark for the Fund is the Russell Midcap Value Index. The Russell Midcap® Value Index measures the performance of those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values. The secondary benchmark is the S&P 500 Index. The S&P 500 Index is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks.
