

# Nuance Mid Cap Value Composite Factsheet

December 31, 2018

## Objective

The Nuance Mid Cap Value product seeks long-term capital appreciation primarily through investments that our team believes are high quality, though temporarily out of favor, US Equity Securities. Our performance focus is on superior risk-adjusted returns.

## Sector Allocation

GICS Sectors	MCVC	RMV
Cash	8.5	0.0
Communication Services	0.0	3.3
Consumer Discretionary	0.5	8.8
Consumer Staples	10.0	5.2
Energy	0.0	5.7
Financials	31.6	17.5
Health Care	18.6	6.8
Industrials	7.0	11.9
Information Technology	6.5	8.4
Materials	1.5	6.2
Real Estate	4.9	14.2
Utilities	11.0	12.0

Note: Sector Classifications are determined by referencing the Global Industry Classification Standard (GICS®). Sector Allocation provided by Bloomberg.

## Portfolio Metrics<sup>1</sup>

- Capitalization: Mid-Cap
- 50 to 90 positions
- Maximum position size is 7.5%
- +/- 15% Russell Midcap Value Index
- Cash limit is 10.0%
- International limit is 15.0%

## Top 10 Holdings

Dentsply Sirona Co.	6.5

### Compliance Statement

Nuance claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Nuance has been independently verified for the periods 11/03/08 - 3/31/2018 by Absolute Performance Verification. The verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. Nuance is an investment adviser registered with the Securities and Exchange Commission. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary separate accounts under management, including those accounts no longer with the firm. The U.S. Dollar is the currency used to express performance returns and assets. Performance results are presented both net and gross of management fees and include the reinvestment of income. Both gross and net of fee returns are reduced by trading expenses. Net of fee returns are reduced by Actual investment advisory fees and other expenses that may be incurred in the management of the account. The firm does not currently assess any Performance Based Fees. From the inception of each composite until 12/31/10, Time Weighted Return was compounded on a monthly basis. Beginning 01/01/11 through present, Time Weighted Return was compounded on a daily basis.

Dispersion is calculated from gross of fee returns using an equal-weighted standard deviation methodology. Only those accounts included for the full calculation period are part of the dispersion calculation. The 3-year Ex-post annualized standard deviation value is calculated using 36 consecutive monthly gross of fee returns to the end calculation period. Prior to January 1, 2017 dispersion was calculated using an asset-weighted methodology. The calculation methodology was updated based on a new performance system dispersion calculation. Nuance has adopted the following Significant Cash Flow Policy. An account will be removed from a composite if a client has given specific instructions that prevent full investment of the cash flow(s) in a timely manner (defined as 5 business days or greater), or if a single cash flow is equal or greater than 10 percent of the total account value based on the beginning of month market value. If these circumstances exist, the account will be removed from the composite and added back to the composite on the first day of the following month.

Our Core offerings are the Nuance Mid Cap Value Strategy, the Nuance Concentrated Value Strategy and the Nuance Concentrated Value Long-Short Strategy. More information regarding Composite descriptions and policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request by contacting client.services@nuanceinvestments.com or 816-743-7080.

## Important Disclosures

Nuance Investments, LLC (the "Firm") is a Registered Investment Advisor. The Firm's Nuance Mid Cap Value Composite (the "Composite") is a composite of actual accounts invested in the Nuance Mid Cap Value investment strategy. The inception date for the Composite is 11/03/2008. The Composite includes all accounts that have invested in the strategy; including accounts no longer managed by the Firm and are presented in US Dollars. The Primary Benchmark for the Composite is the Russell Midcap Value Index. The Russell Midcap Value Index measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Midcap Index companies with lower price-to-book ratios and lower forecasted growth values. The Secondary Benchmarks for the Composite are the S&P MidCap 400 Value Index and the S&P 500 Index TR. The S&P MidCap 400 Value Index measures value in separate dimensions across six risk factors. The value factors include book value to price ratio, sales to price ratio, and dividend yield. The S&P 500 Index TR is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks. Individuals cannot invest directly in any index. These indices are used for comparison purposes only and are not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Composite may differ markedly from that of compared indices due to varying degrees of diversification and/or other facts. Return calculations for the Composite are provided by Clearwater Analytics. Return calculations for all indices are provided by Bloomberg. A full schedule of fees for all Firm products is available upon request. The collection of fees has a compounding effect on the total rate of return net of investment management fees. Net of fee performance is presented after all actual investment management fees and trading expenses.

(1) The market capitalization of at least 80 percent of the portfolio will be maintained in companies with market capitalizations between the smallest and largest members of the Russell Mid Cap Index (defined using a trailing 12 month average of the smallest and largest members on a month to month basis). Sector diversification will be within +/- 15% Russell Midcap® Value Index. This is a fundamental diversification limit. The portfolio will not exceed a 25% weighting in in one industry as defined by GICS classification standards (GICS®). The portfolio may invest up to 15% of its assets in equity securities of foreign companies in countries classified as "developed" by MSCI. Nuance utilizes MSCI to classify its international holdings. The country classification of a company is generally determined by the company's country of incorporation and the primary listing of its securities. MSCI will classify a company in the country of incorporation if its securities have a primary listing in this country. In such cases where a company's securities have a primary listing outside of the country of incorporation, an additional analysis is performed to determine the company's country classification. As of June 2018, the following countries were classified as "developed" by MSCI: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK, and the United States.

(2) Rankings and peer groups created internally using data from Zephyr Style Advisor. Risk-Adjusted Return (Sharpe Ratio), Standard Deviation and return calculations for the Composite and indices provided by Zephyr Style Advisor. The Composites have been compared to various peer groups defined by investment style. Subsets of the Morningstar Large Value Peer Group, the Morningstar Mid Cap Value Peer Group and the Lipper Multi-Cap Value Funds Peer Group with performance history since inception have been presented as investment strategies with similar investment styles for the Nuance Concentrated Value Composite. Subsets of the the Morningstar Mid Cap Value Peer Group and the Lipper Mid-Cap Value Peer Group with performance history since inception have been presented as investment strategies with similar investment styles for the Nuance Mid Cap Value Composite. For peer group comparisons all Returns, Standard Deviation and Sharpe Ratio calculations, including those of the Composite were calculated by Zephyr Style Advisor based upon strategies with monthly return data from December 2008 to present. Zephyr reports on month end returns only. For the purposes of peer group comparisons Since Inception returns are shown beginning 11/30/2008. The Sharpe Ratio is a calculation of a product's risk-adjusted performance over time. The Ratio is calculated by taking a product's annualized excess return over a risk-free rate (The Firm uses the Citigroup 3-Month Treasury Bill as the risk-free rate) and dividing by its annualized standard deviation calculated using monthly returns.

(3) Index statistics are provided by Russell. Characteristics calculations use holdings at market close on the stated date, including cash & cash equivalents. The following Composite characteristics are calculated using Bloomberg: Median Market Cap (midpoint of market capitalization of the stocks in the portfolio), Dividend Yield (annual dividends relative to share price), Return on Equity (net income divided by shareholder equity), Return on Assets (net income divided by average total assets). The P/E Statistics are a Nuance internal calculation. The dollar-weighted harmonic mean of individual company P/E ratios is used. This approach first considers holdings' E/P, which are then summed on a dollar-weighted basis across the entire portfolio to achieve a portfolio E/P ratio. Finally, the inverse of this ratio is taken to arrive at the Portfolio P/E ratio. Active share, as calculated by Morningstar Direct, is a statistic the measures a strategy's holdings relative to the holdings of the appropriate benchmark. Standard deviation is a measure of volatility showing the average deviations of a return series from its mean. The upside capture ratio is an indication of a manager's ability to match returns in periods of market strength, while the downside capture ratio measures a manager's ability to curtail losses in periods of index weakness. Results are gross of fees for the period since inception through present. Both upside/downside ratios and standard deviation are calculated using Monthly Advisor.

(4) The growth of \$10,000 chart is calculated by Zephyr Style Advisor assuming the same cash value at inception and the variance of the investment using monthly return data for each strategy.

Past Performance is not a guarantee of future results. Any investment contains risk including the risk of total loss. There is no guarantee that an investment with the strategy will meet its investment objectives. Please request a copy of the Firm's Full General Disclosures for more information.
