Utilities	3.0%	-5.1%	-8.1%

Note: Sector Classifications are determined by referencing the Global Industry Classification Standard (GICS®). Sector Allocation provided by Advent Portfolio Exchange.

The Fund has contractually agreed to reduce its management fees, and may reimburse the Fund for its operating expenses, in order to ensure that Total Annual Fund Operating Expenses (Excluding acquired fund fees and expenses, leverage, interest, dividend and interest expense on short sales, taxes, brokerage commissions, and extraordinary expenses) do not exceed 1.55% of the average daily net assets of the Investor Class and 1.30% of the average daily net assets of the Institutional Class through at least 08/27/2017. Net expense ratios are as-of the Fund's most recent prospectus and are applicable to investors.

Value. Delivered.

You should consider the fund's investment objectives, risks, charges and expenses carefully before investing. For a statutory or summary prospectus, that contains this and other information about the Funds, call 1-855-NUANCE3 (855-682-6233) or visit our website at www.nuanceinvestments.com. Please read the prospectus carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Investments in small and mid-capitalization companies involve additional risk such as limited liquidity and greater volatility than larger capitalization companies. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. Short sale of securities involves unlimited risk including the possibility that losses may exceed the original amount invested. However, a mutual fund investor's risk is limited to one's amount of investment in a mutual fund. The Fund is new with no operating history and there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Trust's Board of Trustees ("Board of Trustees") may determine to liquidate the Fund.

The Primary Benchmark for the Fund is the S&P 500 Index. The S&P 500 Index is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks. Individuals cannot invest directly in any index. These indices are used for comparison purposes only and are not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Fund may differ markedly from that of compared indices due to varying degrees of diversification and/or other facts. Return figures for all performance shown provided by US Bank.

Nuance Investments, LLC is majority owned by Montage Investments, LLC.

Nuance Investments is the advisor to the Nuance Mid Cap Value Fund, the Nuance Concentrated Value Fund and the Nuance Concentrated Value Long-Short fund which are distributed by Quasar Distributors, LLC. Fund holdings and sector allocations are subjected to change and are not a recommendation to buy or sell any security.

Past Performance is not a guarantee of future results.

¹A criteria to weight the market capitalization of each stock in an index or group. In such groups of stocks, larger companies account for a greater portion of the index or group. Indexes such as the S&P 500 are an example of weighted average capitalization. Beta measures the volatility of the fund, as compared to that of the overall market. The Market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio. R-Squared is a statistical measure that represents the percentage of a fund's movement that is explained by movements in a benchmark index. Upside capture ratios are calculated by taking the fund's monthly return during months when the benchmark had a positive return and dividing it by the benchmark return during that same month; downside capture ratios are calculated by taking the fund's monthly return during the periods of negative benchmark performance. Beta is calculated using Bloomberg. Beta and R-Squared are calculated via Bloomberg using weekly returns from 12/31/2015 to 3/31/2017. Standard Deviation and Upside/Downside Capture ratios are calculated via StyleAdvisor using monthly returns from 12/31/2015 to present. **Standard Deviation will be presented when 36 monthly returns are available.

GIPS Compliance Statement

Nuance claims compliance with the Global Investment Performance Standards (GIPS®). The firm maintains a complete list and description of composites, which is available upon request. More information regarding Composite descriptions and policies for valuing portfolios, calculating performance, and compliant presentations are available upon request by contacting client.services@nuanceinvestments.com or 816-743-7080.

The definition of the firm is the foundation for firm-wide compliance and creates defined boundaries for determining the assets of the firm. In this instance, the firm is defined as Nuance Investments, LLC (Nuance), a majority owned subsidiary of Montage Investments, LLC ("Montage"). Montage is a wholly owned subsidiary of Mariner Holdings, LLC. Nuance founded on November 1, 2008, was formed on the belief that the ability to outperform the broad stock market is predicated on a consistent and disciplined value investing approach. The Investment Management Team selects securities for the Nuance investment portfolios by using an extensive quantitative screening and fundamental research process that identifies leading businesses selling at a discount to fair value and that have the potential to generate above-average rates of returns over time. The Investment Management Team seeks to identify companies across a range of industries and market sectors that have leading and sustainable market share positions, above-average financial strength, and are trading at a discount to their internal view of intrinsic value. The Investment Management Team may sell an investment when it believes it has surpassed its intrinsic value by applying the screening process described above, for purposes of portfolio construction or risk management, or when a more attractive investment opportunity becomes available. For the short side, the Investment Management team seeks to identify companies across a range of industries and market sectors that have average to below average competitive positions and unattractive risk reward profiles. The total firm assets will be defined as all discretionary and non-discretionary assets under management within Nuance. This includes primary investment management accounts, sub-advisory investment management accounts and wrap accounts as well as both fee-paying and non-fee paying assets. Surpassed its intrinsic value by applying the screening process described above, for purposes of portfolio construction or risk management, or when a more attractive investment opportunity becomes available. This includes primary investment management accounts, sub-advisory investment management accounts and wrap accounts as well as both fee-paying and non-fee paying assets.
