

Nuance Concentrated Value Perspectives Discussion

January 31, 2012

Commentary with President and Chief Investment Officer Scott A. Moore, CFA

The first month of 2012 showed continued strength in the overall stock market as modestly improving unemployment levels in the United States and expectations of reasonable year-end earnings reports seemed to build confidence. As for your portfolio, we continue to find leading business franchises trading at a discount to our internal view of fair value. We continue to be underweight in historically high dividend payout ratio industries, like utilities and real estate investment trusts, and we continue to find opportunities in the Industrial, Energy, and Healthcare sectors. Remember that we study each company on its own business merits, confirm that the company maintains a number one or number two market share position in their various niche industries, and that their market share positions are sustainable over time. We want to avoid poorly positioned companies or companies losing market share on a sustainable basis as we believe those companies are more difficult to value.

Performance Update

We continue to be pleased with our overall performance. Since its inception on November 13, 2008, the Nuance Concentrated Value Composite (through January 31, 2012) is up 23.06 percent (annualized and net of fees) versus the Russell 3000 Value Index, up 12.32 percent, and the S&P 500 Index, up 14.49 percent.

Year-to-date through January 31, 2012, the Nuance Concentrated Value Composite is up 4.85 percent (net of fees) versus the Russell 3000 Value Index, up 4.01 percent, and the S&P 500 Index, up 4.48 percent.

	YTD 2012	1 Year	3 Years APR	Since Inception APR	Since Inception Return	Since Inception Standard Deviation (A)	Since Inception Sharpe Ratio (A)
Concentrated Value Composite (Gross)	4.96	10.14	24.17	23.64	97.91	15.63	1.49
Concentrated Value Composite (Net)	4.85	9.65	23.56	23.06	94.92	15.59	1.45
Russell 3000 Value Index	4.01	1.82	17.90	12.32	45.29	20.57	0.58
S&P 500 Index	4.48	4.22	19.22	14.49	54.52	18.34	0.77

Stocks we recently added to your portfolio:

TE Connectivity (TEL): TEL is a leading provider of connector and power supply products around the world. The company missed analyst earnings expectations and issued below consensus guidance as the continued economic softness around the world hurt the company. Our opinion is that these missed expectations are masking continued internal improvements at TEL as the company has worked to optimize its portfolio of products over the last several years. With a solid balance sheet and what we think will be improving returns on capital and thus earnings power, we consider the stock to be an attractive value at these price levels.

Southwestern Energy Corp. (SWN): SWN is a low-cost provider of natural gas and oil primarily in the United States. Recent excess supply of natural gas concerns coupled with a very mild winter across the country has led to lower natural gas prices and lower earnings and cash flow expectations for SWN. We think these issues are transitory and that SWN will see improved earnings as the supply issues and weather normalizes. At today's price levels, we believe SWN represents an excellent risk versus reward opportunity.

Stocks we recently sold from your portfolio:

We did not sell out of any positions this month.

Important Disclaimer

Please note: Nuance Investments, LLC (the "Firm") is a Registered Investment Advisor. The Firm's Nuance Concentrated Value Composite (the "Composite") is a composite of actual accounts invested in the Nuance Concentrated Value investment strategy. The inception date for the Composite is 11/13/2008. The Composite includes all accounts that have invested in the strategy; including accounts no longer managed by the Firm and are presented in US Dollars. The Primary Benchmark for the Composite is the Russell 3000 Value Index. The Russell 3000 Value Index measures the performance of the broad value segment of the U.S. equity universe. It includes those Russell 3000 companies with lower price-to-book ratios and lower forecasted growth values. The Secondary Benchmark for the Composite is the S&P 500 Index. The S&P 500 Index is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks. Individuals cannot invest directly in any index. These indices are used for comparison purposes only and are not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Composite may differ markedly from that of compared indices due to varying degrees of diversification and/or other facts. Return calculations for the Composite are provided by Advent Portfolio Exchange. Return calculations for all indices are provided by Bloomberg. Standard Deviation and Sharpe Ratio calculations for the Composite and indices provided by Zephyr Style Advisor. The Standard Deviation of a product measures the average deviations of a return series from its mean, and is often used as a measure of risk. A large standard deviation implies that there have been large swings in the return series of the manager. The Sharpe Ratio is a calculation of a product's risk-adjusted performance over time. The Ratio is calculated by taking a product's annualized excess return over a risk-free rate (The Firm uses the Citigroup 3-Month Treasury Bill as the risk-free rate) and dividing by its annualized standard deviation calculated using monthly returns. A full schedule of fees for all Firm products is available upon request. The collection of fees has a compounding effect on the total rate of return net of investment management fees. Net of fee performance is presented after all actual investment management fees and trading expenses.

The Composite's performance returns have been audited by Absolute Performance Verification through March 31, 2011. The verification report is available upon request by contacting Client Services at 816-743-7080 or client.services@nuanceinvestments.com. Verification assesses whether (1) The Firm has complied with all the composite requirements of the Global Investment Performance Standards (GIPS®) on a firm-wide basis and (2) The Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation.
