

Nuance Concentrated Value Composite Perspectives

September 30, 2015

from Montage Investments

Description of the Product

The Nuance Concentrated Value Composite is a classic value investment product investing primarily in the equity or equity-linked securities of United States based companies. The product will typically maintain 15-35 positions in the securities of companies that, in the opinion of the Nuance Investments Team, have leading and sustainable market share positions, above average financial strength, and are trading at prices materially below our internally derived view of intrinsic value. The product's primary benchmark is the Russell 3000 Value Index. Clients may also compare the product to the S&P 500 Index.

Longer Term Performance Update

Since Inception Return: The total return (since inception on 11/13/2008 through 9/30/2015) is 17.5 percent (annualized and net of fees) versus the Russell 3000 Value Index up 12.4 percent and the S&P 500 Index up 13.9 percent. We are pleased with this level of outperformance over time.

Risk-Adjusted Returns: Our Sharpe Ratio (since inception on 11/13/2008 through 9/30/2015) is 1.3 (net of fees) versus Russell 3000 Value Index at 0.8 and the S&P 500 Index at 1.0.

Peer Group Returns through 9/30/2015: Comparing our product to peers displays positive results over time. On a total return basis, since 11/30/08, we ranked 18th of 1,202 (2nd percentile) peer group members in the Morningstar Large Cap Value universe, 104th of 408 (26th percentile) in the Morningstar Mid-Cap Value universe and in the Lipper Multi-Cap Value universe we ranked 27th of 218 (13th percentile).

Peer Group Risk-Adjusted Return through 9/30/2015: On a risk-adjusted return basis, since 11/30/2008, (measured by the Sharpe Ratio) we ranked 3rd of 1,202 (1st percentile) peer group members in the Morningstar Large Cap Value universe, 1st of 408 (1st percentile) in the Morningstar Mid-Cap Value universe and in the Lipper Multi-Cap Value universe we ranked 1st of 218 (1st percentile).

Shorter Term Performance Update (Two Year and Year-to-Date)

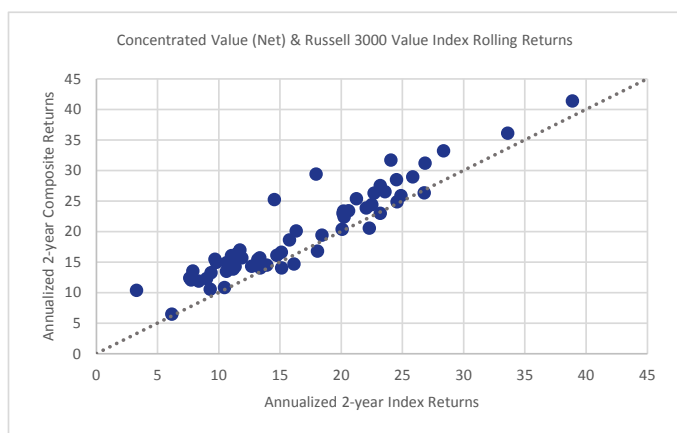

11/13/2008 - 09/30/2015	Rolling 2-Year Periods		Current 2-Year Period as of 9/30/2015	
	Periods Beating the Index	Composite Avg (%) Net of Fees ¹	Russell 3000 Value Index Avg (%)	
Nuance Concentrated Value Composite	53/59	90%	6.5	6.2

Your team at Nuance cautions clients regarding the use of short-term performance as a tool to make investment decisions. That said, if a client wants to consider our short-term performance we recommend emphasizing two-year rolling periods since our inception. Our normal discussion of short-term performance will center on two-year performance, but we will also note calendar year to date results as is our tradition.

For the period ending September 30, 2015, the Nuance Concentrated Value Composite two year rolling return is up 6.5 percent (net of fees) versus the Russell 3000 Value Index up 6.2 percent and the S&P 500 Index up 9.1 percent. Overall, we have outperformed in 53 out of the available 59 two-year periods as shown in the chart labeled Rolling 2-Year Return Periods.

Year-to-date, the Nuance Concentrated Value Composite was down -4.7percent (net of fees) versus the Russell 3000 Value Index down -9.1 percent and the S&P 500 Index down -5.3 percent.

¹Average return shown is the average of all month end rolling two year periods.

Calendar Year Performance as of 09/30/2015	11/13/08 - 12/31/08	2009	2010	2011	2012	2013	2014	YTD 2015
Nuance Concentrated Value Composite (Gross)	4.4	42.2	18.8	6.8	18.4	35.3	8.9	(4.1)
Nuance Concentrated Value Composite (Net)	4.4	41.7	18.1	6.2	17.7	34.4	8.0	(4.7)
Russell 3000 Value Index	0.3	19.7	16.2	(0.0)	17.6	32.7	12.6	(9.1)
S&P 500 Index	(0.4)	26.4	15.0	2.1	16.0	32.3	13.6	(5.3)

Composition of the Portfolio as of 09/30/2015

Portfolio Characteristics ²	Nuance Concentrated Value Composite	Russell 3000 Value Index
Weighted Average Market Cap	34.6b	91.4b
Median Market Cap	4.3b	1.3b
Price to Earnings (internal and ttm)*	12.2x	16.1x
Forward Price to Earnings	16.2x	14.3x
Dividend Yield	3.0%	2.7%
Return on Equity	21.9%	13.3%
Return on Assets	7.0%	4.8%
Active Share vs Russell 3000 Value	95.4%	-
Upside/Downside Capture Ratio vs Russell 3000 Value	89.2%/59.8%	-
Number of Securities	24	1,997

We continue to be pleased with the overall composition of the portfolio. Remember that we are seeking investment opportunities in leading business franchises with better than average valuation support. Using the table below, you can see that the portfolio has a Price to Earnings ratio of 12.2x versus the Russell 3000 Value Index of 16.1x. We are achieving this ratio with a portfolio of companies that have return on assets of 7.0 percent versus the Russell 3000 Value Index of 4.8 percent. This dichotomy of above average companies selling at below average multiples has the opportunity for outperformance over the long-term, in our opinion.

²Based on Nuance internal estimates and benchmarked against the above noted Russell index.

Sector Weights and Portfolio Positioning as of 09/30/2015

Overall, our portfolio has been relatively stable from a sector weighting perspective following our weighting additions in the Energy, Finance and Industrial sectors on underperformance that occurred in the last several months of 2014 and very early in 2015. We are now clearly overweight the Energy, Industrial sectors and Materials. Our underweights include the Consumer Discretionary sector as the combination of fully valued to overvalued stocks and evolving competitive positions make it difficult to find ideas that fit our process. We are also underweight the Real Estate Investment Trust (REIT) industry, the Information Technology sector, the Healthcare sector and the Telecommunication sector as those spaces continue to appear fully valued or overvalued driven broadly by what we have termed the chase for yield or recent market momentum particularly in Technology.

Stocks We Added to Your Portfolio (September 2015):

Patterson Companies Inc. (PDCO): After exiting our position in PDCO in the low \$50's in August, we have begun adding back one of our healthcare stocks following the stock's fall to the low to mid \$40's. PDCO is a leading distributor of dental and veterinary products. PDCO is under-earning its more normal level of earnings and cash flows due to spending on technology and sales related systems. As this spending abates, PDCO should show nice earnings growth and an expanded valuation multiple.

Stocks We Eliminated from Your Portfolio (September 2015):

None.

Nuance Perspectives from President & CIO, Scott Moore, CFA

Through nine months of 2015 we are seeing what we believe to be a natural reaction to a broad market that has been fully to modestly overvalued combined with economic and growth uncertainties. Namely a decline in market prices. This decline is providing our team with an increased opportunity set from our group of leading business franchises. In particular, we are adding to agriculture related stocks, some industrial machinery stocks and we continue to like our positions in energy equipment and services and some banks. On a year-to-date basis, your Nuance Concentrated Value product is now down -4.7 percent (annualized and net of fees) versus the Russell 3000 Index down -9.1 percent and the S&P 500 Index down -5.3 percent. Continued near-term concerns over slowing global economies, particularly China, coupled with concerns over the potential for the Federal Reserve to raise interests has resulted in increased volatility. As we mentioned last month and want to emphasize once again, near-term issues and broad economic concerns do not drive our investment decisions. Rather, our decisions are made by studying one company at a time and focusing on the true intrinsic value of each company. With that number we then allow near-term volatility, emotions, fear and greed to change the market's perceived value of the stocks in which we are invested. As our long-term view of internal intrinsic values is much more stable than current market values, we believe the increased volatility is quite helpful for us in many, if not most, instances.

As always, we want to remind our clients that we believe the longer the time horizon for reviewing a manager's performance the more appropriate. Your Nuance Concentrated Value product is up 17.5 percent (APR and net of fees) versus the Russell 3000 Value Index up 12.4 percent and the S&P 500 Index up 13.9 percent since its inception on November 13, 2008. On a net of fee and non-annualized percentage rate basis, your Nuance Concentrated Value product is up 203.3 percent versus the Russell 3000 Value Index up 123.0 percent and the S&P 500 Index up 144.4 percent. An emphasis on shorter-term time periods and shorter-term results is a natural, emotional reaction to many things in life and appears to be a trend that is possibly growing more pervasive rather than less pervasive. We want to remind our clients that judging any investment manager over shorter-term time horizons and then buying and selling their product based on those shorter-term results is akin to flipping a coin which, in our opinion, is not an appropriate method to judge the results of any money manager over time.

Overall, we continue to find leading business franchises with sustainable competitive positions that are trading below our internally derived view of fair or intrinsic value. We believe our time tested process of finding best of breed businesses with better than the market downside support and better than the market upside.

Please visit our website at www.nuanceinvestments.com for more information about our team, our process and value investing. You may also receive information via traditional mail or email by contacting us at client.services@nuanceinvestments.com or call 816-743-7080.

Thank you for your continued confidence and support.

Scott A. Moore, CFA

Compliance Statement

Nuance claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Nuance has been independently verified for the periods 11/03/08 – 03/31/15 by Absolute Performance Verification. The verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. Nuance is an investment adviser registered with the Securities and Exchange Commission. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary separate accounts under management, including those accounts no longer with the firm. The U.S. Dollar is the currency used to express performance returns and assets. Performance results are presented both net and gross of management fees and include the reinvestment of income. Both gross and net of fee returns are reduced by trading expenses. Net of fee returns are reduced by Actual investment advisory fees and other expenses that may be incurred in the management of the account. The firm does not currently assess any Performance Based Fees. From the inception of each composite until 12/31/10, Time Weighted Return was compounded on a monthly basis. Beginning 01/01/11 through present, Time Weighted Return was compounded on a daily basis.

Dispersion is calculated from gross of fee returns using an asset-weighted standard deviation methodology. Only those accounts included for the full calculation period are part of the dispersion calculation. The 3-year Ex-post annualized standard deviation value is calculated using 36 consecutive monthly gross of fee returns to the end calculation period. Since Inception, Nuance has adopted the following Significant Cash Flow Policy for both composites. An account will be removed from a composite if a client has given specific instructions that prevent full investment of the cash flow(s) in a timely manner (defined as 5 business days or greater), or cumulative cash flow(s) are equal or greater than 3 percent of the total composite market value based on the end of month market value, or if cumulative cash flow(s) are equal or greater than 20 percent of the total account value based on the end of month market value. If these circumstances exist, the account will be removed from the composite and added back to the composite on the first day of the month following the date that the account is fully invested (defined as being within ten percent of the model portfolios cash target).

Our Core offerings are the Nuance Mid Cap Value Strategy and the Nuance Concentrated Value Strategy Nuance. More information regarding Composite descriptions and policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request by contacting client.services@nuanceinvestments.com or 816-743-7080.

Important Disclosures

Nuance Investments, LLC (the "Firm") is a Registered Investment Advisor. The Firm's Nuance Concentrated Value Composite (the "Composite") is a composite of actual accounts invested in the Nuance Concentrated Value investment strategy. The inception date for the Composite is 11/13/2008. The Composite includes all accounts that have invested in the strategy, including accounts no longer managed by the Firm and are presented in US Dollars. The Primary Benchmark for the Composite is the Russell 3000 Value Index. The Russell 3000 Value Index measures the performance of the broad value segment of the U.S. equity universe. It includes those Russell 3000 companies with lower price-to-book ratios and lower forecasted growth values. The Secondary Benchmark for the Composite is the S&P 500 Index TR. The S&P 500 Index TR is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks. Individuals cannot invest directly in any index. These indices are used for comparison purposes only and are not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Composite may differ markedly from that of compared indices due to varying degrees of diversification and/or other factors. Return calculations for the Composite are provided by Advent Portfolio Exchange. Return calculations for all indices are provided by Bloomberg. A full schedule of fees for all Firm products is available upon request. The collection of fees has a compounding effect on the total rate of return net of investment management fees. Net of fee performance is presented after all actual investment management fees and trading expenses.

All material presented is compiled from sources believed to be reliable and current, but accuracy cannot be guaranteed. The information contained herein should not be construed as personalized investment advice and should not be considered as a solicitation to buy or sell any security or engage in a particular investment strategy. Investing involves risk, including the possible loss of principal. Nuance Investments, LLC is majority owned by Montage Investments, LLC. Prior to September 1, 2010 Nuance operated under the name Mariner Value Strategies, LLC.

(1) Risk-Adjusted Return (Sharpe Ratio), Standard Deviation and return calculations for the Composite and indices provided by Zephyr Style Advisor. The Composite has been compared to various peer groups defined by investment style. The Composite is an all market capitalization value investment style. The Morningstar Large Value Peer Group, Mid Cap Value Group and the Lipper Multi-Cap Value Funds Peer Group have been presented as investment strategies with similar investment styles. For peer group comparisons all Returns, Standard Deviation and Sharpe Ratio calculations, including those of the Composite were calculated by Zephyr Style Advisor based upon strategies with monthly return data from December 2008 to 09/30/2015. Zephyr reports on month end returns only. For the purposes of peer group comparisons Since Inception returns are shown beginning 11/30/2008. The Sharpe Ratio is a calculation of a product's risk-adjusted performance over time. The Ratio is calculated by taking a product's annualized excess return over a risk-free rate (The Firm uses the Citigroup 3-Month Treasury Bill as the risk-free rate) and dividing by its annualized standard deviation calculated using monthly returns.

(2) Index statistics are provided by Russell. Characteristics calculations use holdings at market close on the stated date, including cash & cash equivalents. The following Composite characteristics are calculated using Bloomberg: Median Market Cap (midpoint of market capitalization of the stocks in the portfolio), Dividend Yield (annual dividends relative to share price), Return on Equity (net income divided by shareholder equity), Return on Assets (net income divided by average total assets). The P/E Statistics are a Nuance internal calculation. The dollar-weighted harmonic mean of individual company P/E ratios is used. This approach first considers holdings' E/P, which are then summed on a dollar-weighted basis across the entire portfolio to achieve a portfolio E/P ratio. Finally, the inverse of this ratio is taken to arrive at the Portfolio P/E ratio. Active share, as calculated by Morningstar Direct, is a statistic that measures a strategy's holdings relative to the holdings of the appropriate benchmark. Standard deviation is a measure of volatility showing the average deviations of a return series from its mean. The upside capture ratio is an indication of a manager's ability to match returns in periods of market strength, while the downside capture ratio measures a manager's ability to curtail losses in periods of index weakness. Results are gross of fees for the period since inception through present. Both upside/downside ratios and standard deviation are calculated using Style Advisor.

Past Performance is not a guarantee of future results. Any investment contains risk including the risk of total loss. There is no guarantee that an investment with the strategy will meet its investment objectives. Please request a copy of the Firm's Full General Disclosures for more information.
