Nuance Investments

- Nuance Investments, LLC (Nuance) is a boutique classic value investment firm headquartered in Kansas City, Missouri.
- From its seed capital in 2008 of \$30 million, the firm today manages approximately \$2.0 billion in three strategies managed by our investment team.
- Nuance's core belief is that a historically successful and focused investment team and firm managing a reasonable level of investment assets has the potential to reward clients over the long term.
- Nuance manages three equity strategies:

Strategy	Inception	Capacity	Current Assets ¹
Nuance Concentrated Value	2008	\$1.0 billion	\$1.0 billion
Nuance Mid Cap Value	2008	\$2.0 billion	\$1.0 billion
Nuance Concentrated Value Long/Short	2015	\$500 million	\$50 million

- Nuance strategies are all capacity constrained to ensure the ability to outperform going forward.
- The goal of the firm is to provide clients with strategies that can attain and sustain leading risk-adjusted returns over the long-term.

Additional Notes and Disclosures

The primary benchmark for the Fund is the S&P 500 Index. The S&P 500 Index is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks. Individuals cannot invest directly in any index. These indices are used for comparison purposes only and are not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Fund may differ markedly from that of compared indices due to varying degrees of diversification and/or other facts. Return figures for all performance shown provided by US Bank.

You should consider the fund's investment objectives, risks, charges and expenses carefully before investing. For a statutory or summary prospectus, that contains this and other information about the Funds, call 1-855-NUANCE3 (855-682-6233) or visit our website at www.nuanceinvestments.com. Please read the prospectus carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Investments in small and mid-capitalization companies involve additional risk such as limited liquidity and greater volatility than larger capitalization companies. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. Short sale of securities involves unlimited risk including the possibility that losses may exceed the original amount invested. However, a mutual fund investor's risk is limited to one's amount of investment in a mutual fund. The Fund is new with no operating history and there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Trust's Board of Trustees ("Board of Trustees") may determine to liquidate the Fund.

Diversification does not assure a profit or protection against a loss in a declining market.

Definition of the Firm

The definition of the firm is the foundation for firm-wide compliance and creates defined boundaries for determining the assets of the firm. In this instance, the firm is defined as Nuance Investments, LLC (Nuance), a majority owned subsidiary of Montage Investments, LLC ("Montage"). Montage is a wholly owned subsidiary of Bicknell Family Holding Company. Nuance founded on November 1, 2008, was formed on the belief that the ability to outperform the broad stock market is predicated on a consistent and disciplined value investing approach. The Investment Management Team selects securities for the Nuance investment portfolios by using an extensive quantitative screening and fundamental research process that identifies leading businesses selling at a discount to fair value and that have the potential to generate above-average rates of returns over time. The Investment Management Team seeks to identify companies across a range of industries and market sectors that have leading and sustainable market share positions, above-average financial strength, and are trading at a discount to their internal view of intrinsic value. The Investment Management Team may sell an investment when it believes it has surpassed its intrinsic value by applying the screening process described above, for purposes of portfolio construction or risk management, or when a more attractive investment opportunity becomes available. For the short side, the Investment Management team seeks to identify companies across a range of industries and market sectors that have average to below average competitive positions and unattractive risk reward profiles. The total firm assets will be defined as all discretionary and non-discretionary assets under management within Nuance. This includes primary investment management accounts, sub-advisory investment management accounts and wrap accounts as well as both fee-paying and non-fee paying assets surpassed its intrinsic value by applying the screening process described above, for purposes of portfolio construction or risk management, or when a more attractive investment opportunity becomes available. This includes primary investment management accounts, sub-advisory investment management accounts and wrap accounts as well as both fee-paying and non-fee paying assets
