## Additional Notes and Disclosures

The primary benchmark for the Fund is the S&P 500 Index. The S&P 500 Index is a market-value weighted index representing the performance of 500 widely held publicly traded large-capitalization stocks. Individuals cannot invest directly in any index. These indices are used for comparison purposes only and are not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Fund may differ markedly from that of compared indices due to varying degrees of diversification and/or other facts. **You should consider the fund's investment objectives, risks, charges and expenses carefully before investing. For a statutory or summary prospectus, that contains this and other information about the Funds, call 1-855-NUANCE3 (855-682-6233) or visit our website at [www.nuanceinvestments.com](http://www.nuanceinvestments.com). Please read the prospectus carefully before investing.**

**Mutual fund investing involves risk. Principal loss is possible. Investments in small and mid-capitalization companies involve additional risk such as limited liquidity and greater volatility than larger capitalization companies. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. Short sale of securities involves unlimited risk including the possibility that losses may exceed the original amount invested. However, a mutual fund investor's risk is limited to one's amount of investment in a mutual fund. The Fund is new with no operating history and there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Trust's Board of Trustees ("Board of Trustees") may determine to liquidate the Fund.**

Diversification does not assure a profit or protection against a loss in a declining market.

The total firm assets will be defined as all discretionary and non-discretionary assets under management within Nuance. This includes primary investment management accounts, sub-advisory investment management accounts and wrap accounts as well as both fee-paying and non-fee paying assets surpassed its intrinsic value by applying the screening process described above, for purposes of portfolio construction or risk management, or when a more attractive investment opportunity becomes available.
